

Heartland Renewable Energy Society's

Energy Solutions TOUR

A GREAT WAY you can see, first-hand, how to improve your energy consumption and play a vital part in creating a clean, renewable, and safe energy future.

- Active solar photovoltaic systems
- Solar hot water systems
- Passive solar design concepts
- Thermal heat storage in mass walls and slabs
- Energy recovery ventilation
- Super insulation construction techniques
- Earth contact
- Deconstruction / Reconstruction (new home on old site)
- Electric vehicle charging
- Extreme energy retrofits Energy audits information
- Extensive caulking, sealing and weather-stripping
- Smart thermostats
- High efficiency windows
- Tankless gas water heaters
- Ground source heat pumps

See It All!!

October 1st

Details at www.KCSolar.org

8:30 am: Houses open

9:00 am: First House presentations. Each house will make a presentation every 1-1/2 hour.

Presentations at 9:00, 10:30, 12:00, 1:30, and 3:00

15 Homes On The Tour
